PROFILE

I am a highly skilled Senior Software Engineer with over 5 years of experience in full-stack web development and dev-ops. I have a proven track record of exploring new technologies, helping my teammates grow, and producing results. My passion for technology and my desire to always continue learning drive me to leverage my skills to the best of my abilities. I truly enjoy building beautiful applications.

EXPERIENCE

Senior Software Engineer, Equips — June 2023-Present

- Advanced the utilization of the AWS platform to reach the companies goals. SME for AWS, deployment pipelines, and dev-ops for all applications for the team.
- Collaborated with cross-functional agile team including project manager, designers, and software engineers to define project scope, requirements, and timelines
- Implemented integrations with customers and SAAS platforms. This enabled data transfer to customers and 3rd party service providers to be utilized.
- Contributed to developing new features on all aspects of the application including new features for customers, customizations, api integrations, analytics tool enhancements, and bug fixes.
- Technologies include GraphQL API, React UI, PostgreSQL and Dynamo DBs, AWS Lambda .

Software Engineer, Silicon Valley Bank (SVB) — June 2022 - June 2023

- Developed a greenfield sales acquisition application by working with business stakeholders to determine requirements and regulators to ensure banking compliance.
- Implemented features across the tech stack to add functionality and integrate with the SAAS platform Fenargo.
- Ensured code quality with TDD, unit, and integration testing.
- Developed onboarding process for new members of the team to quickly become effective contributors.
- Technologies include React UI, Redux, Node.js, Openshift, Gitlab, and Docker.

Software Engineer, USAA — 2018 - June 2022

- Contributed to three separate projects that included greenfield development, CI/CD, legacy applications, and integration.
- Developed a greenfield small business insurance application that pioneered the first integration with the SAAS platform Guidewire.
- Built a new life insurance quoting application to replace a legacy experience.
- Lead efforts to modernize systems by utilizing Java Springboot, React, Openshift, Gitlab CI/CD, TDD methodologies, and agile practices.
